

Autism is
preventable and
reversible.

(sometimes when something seems too good to be true
it helps to see it again)

Autism is
preventable and
reversible.

Today, 1 in 166 children is diagnosed with autism. It is critical that we have all the facts about this epidemic, including recent developments about autism's relationship to mercury poisoning and how the right detoxification treatment can entirely reverse the disorder. To find out more about this life-changing news, go to www.generationrescue.org. Generation Rescue was founded for parents by parents. We are dedicated to empowering parents with the truth to help their children heal.
